# Our Vision

We believe in talented communities that work together and reward each other. We are the first freelancer economy.

More than your pocket business, we are an ecosystem designed for creatives and professionals.

Your voice. Together.

# thirdSelf Platform

# The first Freelancer Economy

## Give

Your daily 35 Credits  
to cool content.

## Earn

Earn Credits by  
contributing.

## Grow

Use your Credits for  
cool rewards.

**Give** Each member receives **10 daily 3S Credits** to reward other members for their contributions and to assist them on their journey. Premium users receive **30 daily 3S Credits** for increased impact. Unused 3S Credits expire, so make sure to give them out!

---

**Earn** As a thirdSelf member, you can earn **3S Credits** by contributing to the community, for example by submitting quality articles, adding comments, and engaging positively with other members. Your earned 3S Credits don't expire.

---

**Grow** 3S Credits are a way for members to own a piece of the thirdSelf community at large. As a unit of ownership, 3S Credits capture some of the value of the community. They are used as a measure of reputation in the community and can be exchanged for Ethereum based **3RS Tokens**.

# What are 3RS Tokens?

Every month, eligible members have the option to exchange their **3S Credits** for **3RS Tokens**. Tokenized under the ERC-20 standard, **3RS Tokens** are minted monthly and are distributed according to that month's 3S Credit assignment by members. Members need to have an active 3S Wallet (or any other Ethereum Wallet) to be eligible to receive **3RS Tokens**.

# What are 3RS Tokens?

As the first freelancer economy, you can use your earned \$3RS Tokens on the benefits below, or you can hold and sell on an exchange like Uniswap.

## Post promotion on the thirdSelf platform

Give your articles and listings more visibility

## Premium membership access

Use 3RS tokens to receive special discounts on memberships

## Access special platform benefits

New profile themes, access to private forums, and more

## Let's build it together

Guide the community's evolution by accessing special polls and influence platform decisions

## Exclusive discounts on our Shop

Access exclusive member listings and exclusive 3S merchandise

Coming soon

## Become a Voice in the Community

Save your 3RS tokens to increase your platform reputation, or trade and earn cash or crypto

## How are 3RS Tokens distributed?

---

The monthly exchange from **3S Credits** to **3RS Tokens** is available to eligible members. It is not a 1:1 distribution, it is based on a variety of factors like how many **3S Credits** were used during the time period, how many **3RS Tokens** were minted that particular month, along with other market conditions. The final decision is up to the community.

## How can I use 3RS Tokens?

---

The best way to view, spend, and claim your 3RS tokens is to earn 3S Credits by contributing to the community and become eligible to receive **3RS Tokens** by creating a 3S Wallet. You can also purchase 3RS Tokens separately on a verified exchange platform.

## Decentralized and autonomous

---

Your **3RS Tokens** are not managed by thirdSelf, they exist on the Ethereum blockchain, independently of thirdSelf, where they can only be controlled by you (similar to Bitcoin!). Once granted, thirdSelf cannot take your **3RS Tokens**. You can exchange them, gift them, or store them so they can increase in value. It's all up to you.

## Designed and built by doers

---

**3RS Tokens** can be used in unlimited ways. Only a certain amount of **3RS Tokens** will ever be minted (similar to Bitcoin), this serves to reward the community for their contributions and ensure they do not lose value. Every 3RS Token that is used is burned entirely from the supply, making 3RS Tokens deflationary and likely to increase in value as the ecosystem grows.

See more information on **3RS Token Economics**.

# The Roadmap

With the help of the contributors, content creators, and investors, these are milestones we are looking forward to achieve.

# \$3RS Tokens Economics

\$3RS is an ERC-20, or an Ethereum standard token designed to power the thirdSelf platform. Along with 3S Credits, it is the currency and foundation of the first freelancer economy.

## What are 3S Credits?

---

3S Credits in thirdSelf platform are measures of \$3RS credit value — meaning, the more 3S Credits a member acquires, the more 3RS Tokens the member is entitled to when redistribution takes place at the end of the month. During its ignition phase, each member is granted 10 daily 3S Credits—or 30 3S daily Credits if they are a premium member—to reward other member's contribution to the platform. These 3S Credits granted at the beginning of the day must be used, as they do not roll-over, nor can a member self-give themselves 3S Credits.

# \$3RS Total Supply:

**42M** 3RS Tokens initially available to be minted in phases or 'Blocks'. As the platform grows, the community may vote to increase the number of blocks available in the future, if any. 3S Credits may also be limited according to the number of active members in the platform and may no longer be given out daily after a certain point.

# Sustainability-focused Protocol:

Every 3RS Token transaction is taxed a 6% fee, where 1% is redistributed back to all stakeholders, 2% is added as liquidity where 3RS Tokens are available for trade, 1.5% to the thirdSelf Community pool used reward moderators, and 1.5% to the 3S Credit Pool to back the 3S Credits created by the platform.

**3RS Token Transactions**

**6%**  
Tax when used

- 1%** **Redistributed back to existing holders**  
To incentivize transactions - everyone is rewarded when members spend their 3RS Tokens
- 2%** **Liquidity Pool**  
In order to ensure a large enough liquidity pool is available
- 1.5%** **Community Pool**  
Distributed to the platform to reward moderators, and top contributors
- 1.5%** **3S Credit Pool**  
To be used as a safe account to back the 3S Credits created by the platform

## \$3RS has three core utilities:

1. By contributing to the thirdSelf community and earning 3S Credits, which are then minted into 3RS Tokens every month,
2. By purchasing the available 3RS Token supply in a listed exchange,
3. By acquiring 3RS Tokens in one of our direct offerings starting in 2022

## **\$3RS has three core utilities:**

---

Be rewarded! Purchase article/listing/profile promotion packages to receive more views within the thirdSelf Platform, special discounts in memberships and our Shop, rent or access specific features like profile themes, private forums, and more. All \$3RS Tokens used for this utility (spent) are burned (or removed from the total supply) marking the deflationary aspect of the \$3RS token.

---

New \$3RS Tokens are issued on a monthly, or periodic basis, which are sent to eligible members in exchange of the 3S Credits they have acquired from other members due to their contributions to the community. Users can hold and keep their \$3RS Tokens, sell their \$3RS Tokens to the liquidity pool (Uniswap/other) for the nominal market value, or they can use their \$3RS Tokens on a variety of means as explained on the first utility.

---

Members of thirdSelf that hold or have previously held \$3RS Tokens can guide the community's evolution by accessing special polls and influence platform wide decisions through our 3RS DAO (Decentralized Autonomous Organization) powered by Aragon. Members can vote on proposals such as issuance reduction, more uses for \$3RS Tokens within the platform, and the evolution of thirdSelf empowering a talented community.

# Takeaways

## First community-powered, freelancer economy

Designed to reward creatives and professionals for their contributions to the community in a decentralized manner. Each member has a voice, and we provide the means for it to rise and be discovered.

## Deflationary

All \$3RS Tokens used in transactions are burned this means there is a continuous buy-pressure for \$3RS Tokens, reducing the general supply and increasing their value.

## Sustainability-focused protocol

With a 6% tax per transaction, thirdSelf grants more benefits to members and existing holders of \$3RS Tokens with:

1%

of the fee redistributed back to existing members and holders, so everyone wins when 3RS Tokens are spent

2%

Goes to a general liquidity pool so it's always available to trade and be exchanged for currency (USD, Euro) or other crypto (Bitcoin)

1.5%

to the Community Pool to reward moderators and top contributors

1.5%

to a 3S Credit Pool to continuously support the issuance of 3S Credits to thirdSelf members

## Let's build it together

\$3RS Tokens are community-driven, and as a holder, you will have voting power in our decentralized autonomous organization (DAO) platform, powered by Aragon.
